American Fuel Systems and Gas South Partner to Educate Commercial Fleet Owners on Alternative Fuel Options

ATLANTA, GEORGIA, August 11, 2014—American Fueling Systems (AFS), a leader in the alternative fuel industry, and Gas South, Georgia’s fastest growing natural gas provider, are hosting an open house on Aug. 14 to educate commercial fleet owners about the use of natural gas as a vehicle fuel.

Commercial fleet owners who are interested in learning about the transition from gasoline and diesel to natural gas are invited to attend.

The event will provide information about the advantages of using compressed natural gas (CNG), which is more energy efficient and cost effective than gasoline or diesel fuel, as well as offering tips on making the transition an easy process.

“Migrating to CNG may seem a daunting task, but the transition provides enormous benefits both to the environment and to an organization’s bottom line,” said Joey Kline, Director of Business Development for AFS. “We want to ease any concerns fleet owners may have about using CNG and offer a roadmap for making the transition.”

The event will take place from 10 a.m. to noon at AFS’ CNG fueling station in northeast Atlanta. The facility, Georgia’s largest publically accessible CNG fueling station, is owned and operated by AFS and supplied by Gas South. Attendees will be able to tour the CNG station and food and beverages will be provided.

At the event, Gas South and AFS will recognize organizations that have successfully migrated to CNG-fueled fleets. Representatives from two companies, Savannah Distributing and Penske, will be on hand to discuss their successful transition to CNG.

“It is important to not only tout the economic and environmental benefits of natural gas but to reach key stakeholders who are considering making the switch,” said Chris Coan, Vice President and General Manager of business and Government Markets for Gas South. “This educational event is designed for companies that are on the fence about switching to natural gas. They will learn firsthand what it takes to transition to CNG and the benefits of making the switch.”

WHAT: CNG informational open house with Gas South and AFS. All commercial fleet owners who are interested in the benefits of natural gas are invited to attend. Food and beverage will be provided.
**WHEN:** Thursday, August 14, 2014, 10:00 AM – 12:00 PM

**WHERE:** American Fueling Systems CNG Station, 4420 Buford Hwy NE, Atlanta, GA 30341

**About Alternative Fuel Systems**

AFS is a national leader in the alternative fueling industry, providing both CNG and LNG to the transportation and energy sectors.

**About Gas South**

Gas South is a leading provider of natural gas, serving approximately 270,000 residential, business and governmental customers throughout Georgia and Florida. Based in Atlanta, the company distinguishes itself by offering competitively priced rate plans, local customer service, and a dedication to give back to the communities it serves. Gas South has been Georgia’s fastest growing natural gas provider since 2008. Gas South is a wholly-owned subsidiary of Cobb EMC, one of the country’s largest electric cooperatives.
