

# SAVE ON NATURAL GAS

## SUPPORT SHEPHERD CENTER

Gas South's partnership with the Buckhead Coalition has raised more than \$19,000 for the Shepherd Center since 2013. Shepherd Center is home to the nation's only adolescent program specializing in spinal cord and brain injury, which focuses on the specific needs of young adult patients, including those who have incurred sports-related injuries (football, diving, skiing, etc.). The hospital's comprehensive continuum of care provides a number of support services that are essential to all patients and families, especially to those in the adolescent program. The list below highlights a few of these vital support services that are primarily unfunded by insurance and made possible by donor support:

- **Animal-Assisted Therapy**
- **Assistive Technology**
- **Chaplaincy**
- **Family Housing and Transportation**
- **Recreation Therapy**
- **Transition Support Program**
